

## ABOUT THE FUND

The Fund seeks aggressive growth using U.S. government bond vehicles for trading.

## HOW IT WORKS

Government Income Tactical (GIT) is designed for investors seeking aggressive growth using U.S. government bond vehicles for trading. It has been designed to provide a hedge against rising rates and to take advantage of opportunities for short-term price appreciation. The strategy can use inverse bond exposure to counter a rising trend in interest rates. It can also use a small amount of leverage to magnify the effects of the short-term moves characteristic of volatile markets.
